PRODUCT INFORMATION

COMPOSTABLE GLOVES

Glovelee comes in a range of 4 different sizes and are made from and packaged in fully compostable material, which breaks down and becomes metabolised by microorganisms when disposed of in both home and industrial composting. This enables the gloves to serve as a resource efficient alternative, diminishing the reliance on materials with limited recycling outlets.

Glovelee adheres strictly to EN13432 standards without compromising on practicality. The EN13432 certification is a testament to Glovelee's commitment to compliance, assuring users in the foodservice industry of its adherence to the highest industry standards.

The latex and powder free design reduces the risk of allergic reactions and skin irritations, ensuring a safer option for individuals with latex allergies and skin sensitivities. The BPA-free and food grade compliant aspects address the specific requirements of the foodservice sector.

PRODUCT INFORMATION

r.UK SACK®:

New for 2023, our r.UK Sack® is the latest innovation in our product offering.

r.UK Sacks are made in UK from 100% recycled material and have been designed to stimulate recycling and manufacturing in UK. As with all Cromwell stock sacks, r.UK Sacks are CHSA accredited, providing end users with both quality and performance assurance. 'What's on the box, is in the box.'

r.UK Sacks are premium bags, intended to withstand rough treatment in most applications. Manufactured with a star bottom weld, strength and performance consistency are improved as well as giving a neater roll appearance

PRODUCT INFORMATION

REFUSE SACKS

The CHSA Plastic Refuse Sack Standard accreditation scheme now extends to all our recycling and waste sacks and bags, including those previously outwith the scope of the CHSA performance test. This is the customers' guarantee ensuring 'what's on the box is in the box!' Whilst the performance standard is reserved for sacks manufactured specifically to meet the CHSA performance test for the design weights:
5kg, 8kg, 10kg, 12kg, 15kg, 18kg, 20kg.

To improve and simplify our offering, we have consolidated our product range, including rationalising our products codes. The below table illustrates the 90L range.

AR140A1	140L Red	876x1143	95% -PPT Compliant	100 pcs/carton (4 folds x 25 pcs)	50 cartons	11.03kg

We supply two types of heavy duty asbestos sack – the UN 3325 accredited red sack and the UN 3323 accredited clear outer sack.

Supplied separately, both sacks are packed in boxes of 100.

All asbestos waste must be double-bagged, using a UN approved bag with a CDG hazard sign and asbestos code information clearly visible as the primary sack. Once securely sealed, the red sack must be placed into the slightly larger clear bag before being sealed again.

We have recently refined our range and amended the coding to future-proof the products.

Increasing amounts of legislation such as Extended Producer Responsibility (EPR) will be increasing the cost of providing products in all types of packaging (plastic or otherwise). Therefore, the optimisation of carton quantities will be a necessity to reduce the impact of these legislative changes.

The switch to rolls will improve portion control previously afforded by increased cardboard packaging. In addition to this, rolls allow more product to be stacked on pallets and in containers, therefore further increasing the cost-effectiveness of the product and improving the efficiency of our offering to our customers.

PRODUCT INFORMATION

DISPOSABLE PPE

Our Wave® range of aprons, and water-soluble laundry bags have a new logo and redesigned eye catching packaging.

Wave® water-soluble strip laundry bags are available in two sizes. Hygienic and cost-effective, for the safe containment of soiled linen.

The bags incorporate a water soluble seal running the length of the bag and a tie string for securing the bags when full. The strip and tie dissolve in the wash cycle (hot or cold) allowing the contents to discharge into the wash. The bag itself is taken out with the wash and can be recycled.

PRODUCT INFORMATION

COMPOSTABLE

Our compostable caddy liners in all standard sizes that can support food & garden waste management strategies. Manufactured from EcoPond® biodegradable plastic, using starch and lactide-based derivatives of plant sources, these products are fully compliant with the European composting standard (EN13432).

Products fully decompose within the normal 6-10 week composting cycle into biomass, CO2 and water, with no harmful residue.

CW240C0	240L Compostable Liner	(565)x1125x1400	(22)x45x55	100 pcs/carton (10 rolls x 10 pcs)	96 cartons	5.65kg

Compostable Liners inc. Re-order Ribbon

CW005C6	5L Compostable Ribbon Liner	(200)x360x360	(8)x14x14	3120 pcs/ carton (60 rolls x 52 pcs)	40 cartons	8.90kg
CW007C6	7L Compostable Ribbon Liner	(210)x390x390	(8)x15x15	2600 pcs/carton (50 rolls x 52 pcs)	40 cartons	8.71kg

We have improved our compostable product range with the introduction of a compostable re-order ribbon within the bag rolls. With mandatory food waste collections being introduced in the next 5 years, this new yellow ribbon is designed to make the re-order of liners for household collections an easy and efficient process. Each roll is wrapped in compostable film to protect & preserve.

PRODUCT INFORMATION

CLINICAL WASTE

Cromwell is a supplier of waste management solutions to the healthcare sector and an active member of the Healthcare Waste Management Association (HWMA). We offer a full range of sacks for clinical waste management, including ultra-strong ADR approved sacks with very high tear resistance & economically priced sacks with a high recycled content.

Our range includes tiger stripe sacks for deep landfill of offensive/hygiene waste, yellow sacks certified to UN standards for incineration of hazardous waste and orange UN standard sacks for alternative treatment of infectious and potentially infectious waste at a licensed or permitted facility.

CODE	DESCRIPTION	SIZE (mm)	RECYCLED CONTENT	PACKING	PALLET QTY	MNBW
------	-------------	-----------	------------------	---------	------------	------

Clinical Waste Sacks - Incineration

IN090FO	90L 8kg UN	(361)x711x990	40% -PPT Compliant	200 pcs/carton (8 rolls x 25 pcs)	75 cartons	4.88kg
IN090AO	90L 20kg UN	(370)x711x965	60% -PPT Compliant	200 pcs/carton (10 rolls x 20 pcs)	40 cartons	8.64kg

Clinical Waste Sacks - Alternative Treatment

ATO90FO	90L 8kg UN	(361)x711x990	40% -PPT Compliant	200 pcs/carton (8 rolls x 25 pcs)	tbc	4.88kg
ATO90AO	90L 20kg UN	(370)x711x965	60% -PPT Compliant	200 pcs/carton (10 rolls x 20 pcs)	tbc	8.64kg

Clinical Waste Sacks - Landfill

TG030EO	30L Yellow Tiger Stripe	(220)x432x635	97% -PPT Compliant	500 pcs/carton (10 rolls x 50 pcs)	tbc	4.75kg
TG080EO	80L 10kg CHSA Tiger Stripe	(380)x737x850	35% -PPT Compliant	400 pcs/carton (16 rolls x 25 pcs)	108 cartons	4.73kg
TG080CO	80L Tiger Stripe	(380)x740x915	95% -PPT Compliant	200 pcs/carton (8 rolls x 25 pcs)	48 cartons	7.89kg

CLINICAL WASTE

WHICH BAG IS BEST?

Special consideration is needed when dealing with clinical waste, which requires different treatment and disposal methods appropriate to the hazard it may present – offensive, infectious, contaminated with medicines, cytotoxic. Yellow or Orange bags may be used for collection, storage, transport, treatment and disposal, with printed information pertaining to the standard design weight (contents capacity) and, in the case of infectious waste, the UN packaging certification number.

Yellow Bags – for infectious waste, including medicine contaminated infectious waste.

This is waste that has been used in the treatments of infectious patients, those suspected of having an infection and are contaminated with medicines or chemicals. For example:

- PPE (gloves, masks aprons)
- Wipes, dressings, plasters and bandages
- Incontinence waste
- Empty saline or glucose IV bags, and tubing (no active medicines added)
- IV Bags, lines and tubing that have had medicine added
- Chemically contaminated waste.

This waste must be sent for incineration (with energy from waste)

Orange Bags – for Infectious Clinical Waste.

This is waste arising from the treatment of infectious patients, or those suspected of having an infection, possibly contaminated with bodily fluids. NOT containing medicine contaminated waste. For example:

- PPE (gloves, masks aprons)
- Wipes, dressings, plasters and bandages
- Incontinence waste
- Empty saline or glucose IV bags, and tubing (no active medicines added)

This waste may be sent for incineration (with energy from waste) or Alternative Treatment (AT) facilities.

Yellow Bags with Black Stripe (Tiger Bag) – for offensive waste (inc. sanitary / nappy waste)

For waste arising from the treatment of non-infectious patients, possibly containing bodily fluids, for example:

- PPE (gloves, masks aprons)
- Wipes, dressings, plasters and bandages – non infectious
- Incontinence waste – non infectious
- Soiled sanitary towels and tampons – from public and work based female toilets
- Nappies – from baby changing areas and nurseries.

This waste may be sent to landfill, or incineration, or AT.

CLINICAL WASTE

WHICH BAG IS BEST?

Black Bags – General Domestic Waste

This is for waste that is similar to that produced in the home environment, none recyclable, for example

- Flowers
- Food waste and associated packaging
- Used medicine tots
- Sweet wrappers

This waste may be disposed of by landfill or EFW.

Natural (Clear) Bags – Mixed Dry Recycling

For waste similar to that produced in the home environment, which is recyclable, for example:

- Paper / cardboard
- Paper towels
- Newspapers/magazines
- Clean plastic and tins.

This waste may be sent to MRF (Materials Recovery Facility).

Waste Sack Colour Guide

CHSA ACCREDITATION EXPLAINED

We are proud members of the Cleaning and Hygiene Suppliers Association, whose codes of practice provides customers with an assurance of professional conduct, customer service and quality.

We are founding members of the Cleaning & Hygiene Suppliers Association (CHSA) Accreditation Scheme for Plastic Refuse Sacks. Our Sales Director is also a council member of the CHSA and has been since 2009.

The CHSA represents all the major manufacturers and distributors, from global multinationals and national networks to privately owned independent businesses. The organisation gives businesses like ours a powerful collective voice and keeps them informed and connected through events, seminars and newsletters. We are always keen to get involved within these events and other marketing promotions.

Gaining admittance to one of the CHSA's Accreditation Schemes is challenging. Applicants must pass the initial audit of their product range and existing quality assurance processes conducted by the CHSA's Independent Inspector. They are then audited frequently throughout the first year to ensure they maintain the standard required of them to maintain Scheme Membership.

Labels feature key dimensional information such as length, width, minimum net weight and the number of sacks in the pack, while a "fit for purpose" scale, which differentiates between light, medium, heavy and extra heavy duty sacks, helps users purchase the most appropriate product for their needs.

Sacks are regularly tested using the procedure set out in British Standard 6642 to ensure they will not burst with the loads set out in the standard.

Thereafter members are visited by the Independent Inspector repeatedly through each year, who selects products from both the warehouse and production line for inspection, ensuring the standard is maintained.
